

J22a

High-performance in-ear headphones with JBL® drivers and microphone

Outstanding frequency response and pure bass.

JBL J22a in-ear headphones take professional audio technology and make it personal. Drawing on expertise learned from building some of the finest loudspeakers in the world, JBL engineers created lightweight, comfortable headphones that deliver signature JBL sound. High-performance drivers generate outstanding frequency response and pure bass that is deep, powerful and accurate, which lets you hear the truth from your favorite music and artists. Fresh styling makes our J22a as pleasing to the eyes as they are to the ears, and an in-line microphone lets you take calls without taking the headphones off.

- Carry pouch

J22a

High-performance in-ear headphones with JBL® drivers and microphone

Key Features

JBL design details

Your music is an extension of your personal style. So are your headphones. From sandblasted metal-alloy housing rims and tinted silicone sleeves to speaker mesh accents and metallic JBL logos, J22a headphones let you listen with style.

High-performance JBL drivers

JBL drivers deliver precise, powerful sound for an exceptional listening experience. Bass is pure, deep and accurately produced the calling card of legendary JBL sound.

One-button remote with built-in microphone

Made specifically for use with Smartphones, the in-line remote allows you to play and to pause music and to answer and to end calls. A built-in microphone lets you answer calls while leaving the headphones on. The one-button remote/mic is compatible with most smartphones.

Silicone sleeves

Ears come in all shapes and sizes. So we include three pairs of silicone sleeves: small, medium and large. An optimal fit not only increases comfort, it also reduces ambient noise in the ear canal.

Flat elastomer cables and rubber slider

Tangled cables are a hassle. J22a have flat elastomer cables that resist tangling and a rubber slider that keeps the cables neatly organized.

Rugged strain relief

Strong, secure connections between housings and cables are critical for both durability and sound quality. Our headphones feature rugged silicone strain-relief connectors that dampen vibration for enhanced acoustic performance.

Gold-plated jack with extension ring

The gold-plated jack incorporates an extension ring that works with most custom smartphone covers and cases. So you don't have to slip off your protective case to connect the headphones.

Carry pouch

JBL sound is always worth protecting. An included carry pouch stores the extra silicone sleeves and keeps the headphones safe from nicks and scratches.

Technical Specifications

- Type: In-ear style
- High-performance driver: 1-1/32" (8.6mm)
- Frequency range: 18Hz – 20kHz
- Impedance: 32Ω
- Flat elastomer cable: 4' 3-3/16" (1.3M)
- Plug: 1/8" (3.5mm) gold plated
