

# JBL ONBEAT™

Legendary JBL® sound for your iPod, iPhone and iPad

The JBL OnBeat™ loudspeaker dock is what your iPad has been waiting for — the first JBL dock to deliver realistic, high-output sound from any iPod, iPhone or iPad. A universal connector firmly docks iPad, iPod and iPhone and lets you rotate iPod and iPhone screens to portrait or landscape orientation for the best video display. The JBL OnBeat docking station features dual Phoenix full-range transducers with computer-optimized DSP equalization for a richly detailed soundstage, an IR remote puts you in full control of system functions and music navigation from across the room, and it even keeps your devices charged when docked. With an optional composite cable, the JBL OnBeat system can even send video content on to your TV for the whole crowd to enjoy. You've had your iPad, iPod and iPhone all to yourself for long enough — and the JBL OnBeat dock gives them the attention they deserve.
