

L 6 0 T

Pro Sound Comes Home.

Designed by the most respected speaker name in recording studios and concert halls, JBL's new "L" Series speakers provide the highest quality professional sound in the home environment. The L60T, a 2-way 8" floor standing system, offers extended frequency response, original dynamic range, and the recreation of the full sound stage. Its combination of a pure titanium high frequency transducer, laminated high polymer cone mid/low frequency transducer and high spatial identification dividing network yields sound reproduction that's simply superior. The L60T is housed in cabinetry reflective of JBL's tradition of aesthetic excellence with hand oiled hardwood veneer on all six surfaces.

The L60T...Bringing Pro Sound
all the way home.
